WCV DB 6 INDEX (ORIGINAL INDEX)

Note: This is a crude index in the original DB; both the content and the filming (see M names) are imperfect, so one must perform a careful search of the entire document to receive full benefit of content. Nearly all the transactions are indentures (deeds); other types of transactions such as "Trusts" (Deeds of Trust), etc. are usually written in as such. It should also be noted that many transactions such as privy examination of wives, are not indexed.
