

INDEX TO WCV DB 9: 1825-1829

Note: This is a crude index in the original DB. One must perform a careful search of the entire document to receive full benefit of content since the index mentions only the primary party or parties of the subject transaction. Nearly all the transactions are indentures (deeds); other types of transactions such as "Trusts" (Deeds of Trust), etc. are usually written into the index as such. It should also be noted that many transactions such as privy examination of wives, are not indexed.
